SECTION 1. IC 8-1-8.5-9 IS ADDED TO THE INDIANA CODE AS A NEW SECTION TO READ AS FOLLOWS [EFFECTIVE JULY 1, 2014]: **Sec. 9. (a) For purposes of this section, "DSM order" refers to an order of the commission that establishes or approves:**

- (1) energy efficiency targets or goals for public utilities; or
- (2) an energy efficiency program sponsored by a public utility.

The term includes the December 29, 2009, order of the commission concerning demand side management programs.

(b) For purposes of this section, "energy efficiency program" means a program that is:

- (1) sponsored by a public utility or a third party administrator; and
- (2) designed to implement energy efficiency improvements (as defined in 170 IAC 4-8-1(j)) for customers.

The term does not include a program designed primarily to reduce demand.

(c) For purposes of this section, "industrial customer" means a person that receives services constituting more than one (1) megawatt of electric capacity from a public utility.

(d) An industrial customer may opt out of participating in an energy efficiency program that is established by a public utility in response to a DSM order by providing notice to the public utility. Except as provided in subsection (e), a public utility may not charge an industrial customer that opts out rates that include energy efficiency program costs that accrue or are incurred after the date on which the industrial customer opts out. For purposes of this subsection, costs for an energy efficiency program include:

- (1) program costs;
- (2) lost revenues; and
- (3) incentives approved by the commission.

However, an industrial customer remains liable for rates that include energy efficiency program costs that accrued or were incurred before the date on which the industrial customer opts out, regardless of the date on which the rates are actually assessed against the industrial customer.

(e) An industrial customer that opts out of participating in an energy efficiency program may subsequently opt to participate in the same or a different energy efficiency program. The industrial customer must participate in the subsequent energy efficiency program for at least three (3) years after the date on which the industrial customer opts in. If the industrial customer terminates participation in the subsequent energy efficiency program during the three (3) year period described in this subsection, the industrial customer shall continue paying energy efficiency program rates, including costs described in subsection (d), for the remainder of the three (3) year period.

(f) Energy efficiency targets or goals that are approved or mandated by the commission in a DSM order must be calculated to exclude all load from an industrial customer that opts out under subsection (d).

(g) The commission may adopt:

- (1) rules under IC 4-22-2; or
- (2) guidelines;

to assist public utilities and industrial customers in complying with this section.

(h) Not later than August 15, 2014, the commission shall prepare a status report on all energy efficiency programs implemented under the DSM order issued by the commission on December 29, 2009. The commission shall provide the status report in an electronic format under IC 5-14-6 to the regulatory flexibility committee and legislative council. The status report must consider the following:

- (1) The status and effectiveness of all energy efficiency programs, including whether efficiency gains attributable to a federal conservation program are being measured as part of an energy efficiency program implemented under the 2009 DSM order.
- (2) The degree to which energy efficiency program costs are shifted among customer classes.
- (3) Program costs to date.
- (4) Program costs projected to be incurred in complying with all DSM orders.
- (5) The actual impact of program costs on all customer rates and the projected impact of program costs on all customer rates upon full implementation of the 2009 DSM order.
- (6) Current and projected costs and benefits of current and anticipated energy efficiency programs, including costs and benefits associated with third party administrators and evaluation, measurement, and verification contractors.
- (7) The effectiveness of energy efficiency programs in reducing energy consumption and demand.
- (8) Any additional information or recommendations the commission determines is necessary.

This subsection expires December 31, 2014.
